Quick Reference Chart

[illegible][illegible]

Top 10 Reasons to Recycle

[JOIN THE NRC](#)

1. Good For Our Economy

American companies rely on recycling programs to provide the raw materials they need to make new products.

2. Creates Jobs

Recycling in the U.S. is a \$236 billion a year industry. More than 56,000 recycling and reuse enterprises employ 1.1 million workers nationwide.

3. Reduces Waste

The average American discards seven and a half pounds of garbage every day. Most of this garbage goes into to landfills, where it's compacted and buried.

4. Good For The Environment

Recycling requires far less energy, uses fewer natural resources, and keeps waste from piling up in landfills.

5. Saves Energy

Recycling offers significant energy savings over manufacturing with virgin materials. (Manufacturing with recycled aluminum cans uses 95% less energy.)

6. Preserves Landfill Space

No one wants to live next door to a landfill. Recycling preserves existing landfill space.

7. Prevents Global Warming

In 2000, recycling of solid waste prevented the release of 32.9 million metric tons of carbon equivalent (MMTCE, the unit of measure for greenhouse gases) into the air.

8. Reduces Water Pollution

Making goods from recycled materials generates far less water pollution than manufacturing from virgin materials.

9. Protects Wildlife

Using recycled materials reduces the need to damage forests, wetlands, rivers and other places essential to wildlife.

10. Creates New Demand

Recycling and buying recycled products creates demand for more recycled products, decreasing waste and helping our economy.

Don't flush medications!

Flushing medications can cause contamination to Kansas aquatic environments.

Instead of flushing, residents can take excess or expired prescription and over-the-counter medications to the local household hazardous waste facility listed below.

Riley County Household Hazardous Waste Facility
6245 Tuttle Creek Blvd. • Manhattan, Kansas • 785-539-3202
Open Monday – Friday • 7:30 a.m. – 4:00 p.m.

This facility serves the Big Lakes Region which includes Clay, Dickinson, Geary, Marshall, Morris, Nemaha, Pottawatomie, Riley(Host County), Wabaunsee, and Washington counties.

This facility CANNOT accept controlled or narcotic substances, such as prescription painkillers like Percocet, or others like Xanax. If you cannot use this local household hazardous waste facility, then follow the Kansas Department of Health and Environment disposal recommendations listed below to prevent purposeful or accidental recovery of these medications.* Your local retail pharmacies support this water quality protection project.

Prepare excess medication as follows:

Crush or dissolve pills in water, coffee, or another liquid. Make a paste of the dissolved pills or liquid medication by adding it to kitty litter or coffee grounds. Put the paste in a closed container, making sure any personal markings are removed. Then put the closed container in the trash.

** These steps to safe disposal are recommendations from the Kansas Department of Health and Environment and are detailed in a guidance document available at <http://www.kdheks.gov/waste/guidance/sw07-01.pdf>.*

This publication was published by the Kansas State University Pollution Prevention Institute. For more information, call 800-578-8898.

COMMON TYPES OF PLASTICS

Plastic Identification Code	Type of plastic polymer	Properties	Common Packaging Applications	Examples
	Polyethylene Terephthalate (PET, PETE)	Clarity, strength, toughness, barrier to gas and moisture.	Soft drink, water and salad dressing bottles; peanut butter and jam jars	
	High Density Polyethylene (HDPE)	Stiffness, strength, toughness, resistance to moisture, permeability to gas.	Milk, juice and water bottles; trash and retail bags.	
	Polyvinyl Chloride (V)	Versatility, clarity, ease of blending, strength, toughness.	Juice bottles; cling films; PVC piping	
	Low Density Polyethylene (LDPE)	Ease of processing, strength, toughness, flexibility, ease of sealing, barrier to moisture.	Frozen food bags; squeezable bottles, e.g. honey, mustard; cling films; flexible container lids.	
	Polypropylene (PP)	Strength, toughness, resistance to heat, chemicals, grease and oil, versatile, barrier to moisture.	Reusable microwaveable ware; kitchenware; yogurt containers; margarine tubs; microwaveable disposable take-away containers; disposable cups and plates.	
	Polystyrene (PS)	Versatility, clarity, easily formed	Egg cartons; packing peanuts; "Styrofoam"; disposable cups, plates, trays and cutlery; disposable take-away containers;	
	Other (often polycarbonate or ABS)	Dependent on polymers or combination or polymers	Beverage bottles; baby milk bottles; electronic casing.
